Heralding the
Establishment of a
**PROGRESSIVE
UNIVERSITY
COLLEGE**

Dato' Raymond Ooi Chong Seong

President, Legenda Education Group

Our 200-acre integrated university township, dedicated academics and dynamic ethos provides a first-class learning environment fit for students of the 21st century.

Heartiest Congratulations and Gratitude

We would like to extend our heartfelt gratitude to our honourable guest, Yang Berhormat Dato' Seri Mohamed Khaled bin Nordin, Minister of the Higher Education Malaysia, who has given his stamp of approval by gracing and officiating this momentous occasion.

We would also like to extend our special thanks to the Ministry of Higher Education (MOHE) and Malaysian Qualifications Agency (MQA) whose constant guidance and advice to us has helped boost our confidence to achieve the best for our students.

We would also like to express our highest gratitude and appreciation to our board of directors, the senior management team, all staff, partners and our counterparts from the University of East London and Coventry University. Thank you for your tireless efforts and support in making this ceremony a reality.

This year we welcome yet another exciting and momentous academic year. This new academic year is indeed an important one for Linton College as it marks a new beginning for its institution that has been upgraded from a humble college to University College status. It is a great honour for a college whose years of achievements have not only produced a stream of successful and skillful graduates in their respective career fields, but has also revolutionised the local education system in terms of its exceptional growth and innovativeness.

An American writer and philosopher known for his work in Social Psychology and Political Science, Eric Hoffer, once said, "We are told that talent creates its own opportunities. But sometimes intense desire creates not only its own opportunities, but its own talents". Mr. Hoffer's wise philosophy indeed rings close to home as Linton University College has strived for more than 20 years investing in talents and perfecting its track record through its innovative strategies and policies. These commitments have not only opened up many opportunities for Linton to transform and upgrade, but have also guaranteed its newly garnered status as a University College.

Providing Education for All Generations

Driven by its VISION to become one of the leading Private Institutions of Higher Learning, Linton University College is committed in providing the appropriate environment, facilities and guidance for the educational and social development of individuals, taking into account the manpower needs of the nation, and to position itself among other leading institutions of higher learning in the region by having the ability to provide an immense array of quality and versatile academic programmes.

Setting Academic Excellence Benchmarks

With an ambitious aspiration to position itself among other reputable tertiary institutions in the region, Linton University College begins its transformation by improving its academic excellence in various aspects of its education system.

Through our curriculum of industry-based education, we ensure that all our students graduate with the highest standards of professionalism and employability. To meet this goal, our graduates are exposed to both theoretical and practical industrial training, a "hands-on" teaching methods whereby they will have the opportunity to "see and experience the work environment" of their respective career fields even before they complete their studies. The students are also exposed to various work related and soft skills essential in the workplace including leadership, communication, teamwork, time management, career enhancement and other skills that will further enhance the students' employability in their chosen career paths. As such, we are confident that employers and the public at large appreciate the quality and prestige of a Linton University College degree in future.

Further development has also been made to improve our teaching and learning methodologies and curriculum so that we can sustain a culture of attainment and progression. This is evident in our lecturers' involvement in research and staff development programmes with fellow professionals from all corners of the world to further enhance their teaching methods in their respective fields. We are confident that through this exposure, our academic staff are able to utilise their new skills in our lecture halls to enhance our students' understanding and mastery of their respective subject matters.

Achieving Global Accreditation and Recognition

Its constant achievements enabled Linton University College to progress steadfastly on the academic ladder. These achievements also include Linton's capacity to provide quality accredited programmes to our students. By constantly abiding to strict accreditation criteria of the Malaysian Qualifications Agency (MQA) and other related local and international professional agencies, we are committed to work towards ensuring all our programmes are fully accredited and as such, we are proud to have one of the highest number of fully accredited programmes amongst private tertiary institutions.

Linton's academic and quality assurance standards transcend international boundaries as our current degree programmes offered in collaboration with our UK partners namely the University of East London and Coventry University are validated in accordance to the UK Quality Assurance Agency for Higher Education's framework.

Our resolute focus in meeting international academic standards has resulted to the accreditation and recognition of Linton's qualifications by numerous countries including the People's Republic of China, Islamic Republic of Iran, Republic of Mauritius and others.

Enriching Students' Experiences

In 2005, Linton University College took an important step by joining Legenda Education Group and relocated to an integrated campus in a university township in Mantin, Negeri Sembilan, approximately 50 km from the capital city and reachable within 30 minutes from Kuala Lumpur city centre.

With more than RM 1 billion invested in the development of the township, Linton University College is able to provide its students an excellent and dynamic learning environment. Now, Linton University College lies in a sprawling township of more than 200 acres, complete with high quality residential, teaching and sporting facilities, and other amenities.

Within its own campus, Linton University College is equipped with modern facilities including state-of-the-art Engineering laboratories, computer laboratories, Visual Arts studios, spacious lecture theatres, and a well stocked library amongst other resources. Linton University College also provides a readily accessible advice and support services for its students under the 'WE CARE' pastoral care system throughout their study in its campus to ensure that all students are able to adapt well to their studies and to their newfound social environment.

Our student-centric approach has always placed students at the centre of our education mission and stimulates them to take an active and effective part in their learning, and in their overall experience of our Institution. In doing so, it has captured the imagination of students from all over the world and thus, positions Linton University College as a premier education destination for students from more than 40 countries.

Internationalising Our Profile and Character

Linton University College's excellent track record has indeed attracted many international students into its campus. At present, more than 2,500 students from over 40 countries have registered themselves as future graduates of our Institution. Linton University College has also expanded our academic human resources to include lecturers from diverse backgrounds and nations to accommodate our growing international student population.

Linton's long-term association with the University of East London (UEL) and Coventry University provides a platform for it to function as a local tertiary institution that meets international academic standards, offering numerous internationally recognised (3+0) franchised programmes to our students. Through such synergistic collaborations, Linton University College has enhanced its international profile and character through joint development of curriculum, research, staff development and knowledge transfer with our international partners.

Exploring Uncharted Territories

This welcoming upgrade from a reputable localised college to a University College-level institution with an international standard has undeniably boosted our confidence in striving further for excellence.

Linton University College's past successes and its new status as a University College have opened new opportunities for its Institution and at the same time, present a new set of challenges as there is a vast ocean of uncharted opportunities that has yet been explored. Making our way through each new path as we advance through this new academic year of 2010, Linton aims to use this new status as a platform for transformation as a full fledged University College, with immense passion and dedication to improve our image and ability to become a highly reputable institution in providing first class tertiary education to all generation, not just in Malaysia, but throughout the world.

Adhering closely to the nation's mission to be recognised as Asia's new education hub, Linton University College aims to position itself as a renowned international university college in the field of Engineering, Built Environment and Technology. We will continue to provide high standard education services to students from all around the world in these critical fields of studies with particular emphasis on practical and industry-oriented courses.

Instead of becoming merely "paper qualified" individuals, we want our graduates to become "techno-preneur" professionals who are constantly prepared to explore new territories in their career fields, and have the ability and skills to explore "Terra Incognita" - the uncharted landscape of tomorrow.

Linton University College looks forward to many years of uncompromising commitment to accomplish this VISION. We aim to make Linton a renowned centre of scholarship, learning and teaching, intellectual creativity and humane values. It is our mission now to elevate our distinguished Institution to become a full university within the next 5 years.

Celebrating A New Milestone for Legenda Education Group

Linton University College's newly acquired status heralds a new important milestone for Legenda Education Group, a fast growing education Group and one of the largest in the country. Presently, there are five institutions under the Group - Linton University College, Pertama Institute of Technology (ITP), Jati Institute, Institute of Medical Sciences Mantin (IMM) and Legenda College.

With the objective to promote "homegrown" institutions that are nationally and internationally recognised for their excellence, Legenda Education Group offers programmes in Engineering, Quantity Surveying, Architecture, Construction, Information Technology, Computer Science, Business & Management, Accounting & Finance and the Visual Arts at Diploma, Higher National Diploma (HND), Bachelor's and Master's levels.

In efforts to strengthen its field of offerings, the Institute of Medical Sciences Mantin (IMM) was brought into Legenda Education Group, signalling the Group's entry into the field of Allied Health & Medical Sciences. With more than 200 nursing students already registered in its programmes, IMM aims to further consolidate its position in the field by introducing more programmes in health sciences and securing collaborative programmes at both Diploma and Degree levels with international university partners.

Legenda Education Group's unique and student centric "WE CARE" pastoral care system is designed to nurture and enhance students' learning potential and experience. The Group ensures that all students undergo a series of Orientation, Enhancement and Language programmes to prepare them with the necessary skills required before the commencement of their mainstream programmes. After all, it is the Group's vision to develop its students by providing an environment for personal growth, opportunity, knowledge, exposure, personal attention and career direction, in efforts to build a generation of professionals to cater to a knowledge-based economy to meet global needs.
